

NITROUS POWER

NITROUS POWER
Vehicle Jump Starter and USB
Power Supply

**NEW PRODUCT
RELEASE**

Don't get stuck out on the trails or on the side of the road because of a battery failure, our NITROUS POWER jump starter can get you up and running quickly and easily. Most UTV's are pretty much impossible to start if their battery dies, so unless you have someone to jump your vehicle in that situation, plan for a long walk. Designed to be used as a back up battery and a charger for your devices, this product provides plenty of amperage to start most vehicles. Cars, trucks, UTV's, ATV's, motorcycles, boats, the battery in our pack provides more capacity than some vehicles stock batteries. Its USB's will power up or charge devices quickly with its 2 amp ports. The built in super bright LED's provide a work light or lantern function. Our sturdy casing and weatherproof gaskets will keep the Nitrous Power Jump Starter protected and available when you need it most. The included mount system allows you to install the jump starter in a convenient location and not have to worry about it being tossed all over when you're on rough terrain.

AAC was created to provide quality products that will give our customers confidence in their vehicles and help them enjoy their investments.

Power Up your vehicle with Nitrous Power!

NITROUS POWER

Jumpstarter in use on motorcycle. Cables store inside body and include a reverse polarity protection circuit.

Provides 200 amps of continuous cranking power and 400 amps peak.

Includes 110 volt wall charger and 12 volt cigarette charger.

Features:

- 11200 mAh Lithium battery pack inside. Provides 400 amps peak, 200 amps continuous
- 2 USB ports rated at 2 amps each and a 2.1 mm output plug for charging or powering devices
- Sturdy heavy wall injection molded housing for strength and durability
- Patented Watertight design so it can be mounted most anywhere
- Rigid mount included with threaded knobs for quick removal of the pack. Can be easily hardwired to the vehicle so it charges whenever the engine is running
- Lid can be removed while pack is in the mount for use without having to remove completely
- 4 Cree super bright LED's provide a work light or lantern function.
- Includes both 110 volt wall charger and 12 volt cigarette charger
- 1 year warranty against manufacturers defects

Super Bright LED's provide light when you need it.
